▼ FY2012 DESIGNATED HIGH PRIORITY ITEM - PRIORITY TOPIC

TOPIC: Government Efficiency

SUBJECT TITLE: Ranking of Firms That Responded to the Parking Services Request for Proposal (RFP)

EXPLANATION: This item was first presented to the Commission last fall. The Commission decided not to make this decision prior to the election and the deferred it to the March 13th meeting. One of the performance goals the Commission set for the Town Manager was to improve government efficiency, including looking at areas where the private sector might be more efficient and effective than we are in-house. An obvious function to evaluate in that regard was parking operations, given the degree to which the Town lagged behind best practices in that industry when the current administration arrived and the amount of time the Assistant Town Manager has had to devote to managing the operations in the past eighteen months. Based on staff recommendation, the Commission authorized the release of an RFP for oversight and management of the parking function in Lauderdale-by-the-Sea.

We were pleased with the number and quality of the proposals received. The Town received five (5) very competitive proposals from national parking firms to operate the Town's parking services and one (1) proposal to provide citation management services. An Evaluation Committee consisting of the Town Manager, Finance Director and Assistant Town Manager, with technical assistance provided by Fred Bredemeyer, President of ConsulPark, reviewed all the proposals and met numerous times to discuss and review them.

Staff prepared the attached Parking RFP Summary Report (**Exhibit 1**) to assist the Evaluation Committee in its review of all of the proposals. The report shows the most pertinent aspects of each proposal. The ConsulPark report is attached (**Exhibit 2**).

Following a detailed study and evaluation of the proposals, the Evaluation Committee shortlisted the following firms: LAZ Florida Parking, Republic Parking and SP Plus Municipal Services (a.k.a. Standard Plus Parking) for further evaluation based on their municipal experience and their proposed costs. We asked them to clarify certain points and to give us figures for a defined staffing level and number of hours so we could make a valid financial comparison of the different responses. The top three firms were invited to give presentations to the Evaluation Committee in September, and respond to the Committee's questions and requests for clarification of their proposals. The Evaluation Committee ranked the firms in the following order:

- 1. SP Plus (Standard Plus Parking)
- 2. Republic Parking.
- 3. LAZ Florida Parking

The Evaluation Committee found the Standard Plus Parking and Republic Parking proposals to be very similar in quality. The better cost (driven in part by their offer of four free pay stations) and the local management presence

tipped the scale in favor of Standard Parking. Financial summaries of the Standard Plus and Republic Parking proposals are attached. (Exhibit 3)

Both Standard and Republic are led by knowledgeable parking professionals, have municipal on-street and metered parking lot management and operations experience, offer competitive citation management programs, can reduce our operating costs through their national buying power, train their staff in being ambassadors for the cities they contract with, work closely with local businesses to make sure the parking operation is supportive of the needs of the businesses, and implement current parking best practices. Both Standard Plus and Republic have indicated that they can accommodate reasonable requests from the Town to transition existing employees to their employment into the Enforcement Officer and Meter Technician positions as long as the employees passed their background screens. (We address this topic in more detail in a separate agenda item.)

There are multiple reasons to consider contracting with a national parking firm for operation and management of our Parking System.

- 1. Cost Savings Standard Plus' proposal would save the Town about \$124,500 (31%) annually. That savings would decrease if the Town asked them to make accommodations in the hiring of existing Town personnel, but the savings would still be substantial. Republic's proposal would save the Town \$77,000 (17%) annually. The initial cost saving projection is attached (Exhibit 4).
 - Both firms offer better pricing on meters, pay stations, fees for automated meters, and citation management through their national buying power than the Town is able to achieve.
- 2. Revenue Considerations The Standard Plus proposal produces additional revenue in two areas. Currently and in all of the other proposals, a fee is charged when delinquent accounts are collected and the delinquent fee is kept by the citation management company. In the Standard Plus proposal there is no fee, so the Town has the option to continue to charge the delinquent fee but keep the revenue ourselves. We estimate the incremental revenue to be approximately \$15,000 per year.
- 3. Industry Knowledge / Best Management Practices Standard Plus' management team has over 60 years of municipal on-street parking experience. As full time professionals in the field they keep up to date on the trends in the industry and help to create the best practices that others emulate. For example, the company proposed to implement a two-person collection team for accountability, an industry norm, rather than the one person we use.
- 4. Customer Service Orientation Standard Plus lists themselves as a leader in the industry in all of the customer satisfaction benchmarks. They attribute this to the strength of their training programs and the company's commitment to training. Standard Plus strives to create ambassadors for the Town through their training program, rather than parking enforcement officers.
- 5. Contracting the service will reduce the Assistant Town Manager's involvement in the daily operation and management of the Parking System and allow him to focus on other areas of responsibility.

RECOMMENDATION: Staff recommends that the Town Commission select Standard Plus Parking and Republic Parking as the number 1 and 2 ranked firms and direct the Town Manager to negotiate a contract with Standard Plus Parking for Town Commission consideration. Since so much time has passed since they submitted their proposal, we have confirmed with Standard Plus that they stand by the terms of their proposal and that there is no change in the management and staff they will assign to our account.

If a satisfactory agreement cannot be reached with Standard Plus Parking, then the Town Manager is directed to negotiate a contract with Republic Parking.

EXHIBITS:

- 1. Parking Services RFP Evaluation Summary
- 2. ConsulPark's Evaluation Report
- 3. Summary Financial Proposals Provided by Standard Plus and Republic Parking.

 (The detailed proposals submitted by the other respondents are on file in the Town Clerk's Office.)
- 4. Financial Comparison

MEMORANDUM

TO:

Bud Bentley

FROM:

Fred Bredemeyer

RE:

Evaluation of Parking Services Proposals

Date:

October 6, 2011

ConsulPark was engaged to review and evaluate the parking services proposals and to provide technical assistance to the selection committee through the evaluation and selection process. This document serves to summarize the review of the proposals.

The Town short listed three proposals: LAZ Parking, Republic Parking and Standard Parking. The proposals of these respondents were provided to the consultant for review and the three short listed companies were invited for presentations. The consultant attended all three of the presentations and assisted in the question and answer portion of the process.

The selection committee evaluated the proposers based on five general categories:

- 1) Understanding the Town's needs and the firms approach to addressing the Town's needs and requirements.
- 2) Overall parking experience, qualifications and capabilities of proposing team.
- 3) Approach to providing customer service.
- 4) Citation Management System.
- 5) Cost to the Town.

Each of the three short listed proposers submitted very good proposals. A summary of the proposals based on the written and oral presentations is provided below.

LAZ Parking:

LAZ Parking is a leader in municipal parking privatizations and has a vast portfolio of public and private systems under their management. LAZ has a strong South Florida presence and an extremely competent management team.

Based on the evaluation criteria, the major considerations of LAZ's proposal are the following:

- 1) LAZ has significant municipal experience both nationally and locally including the City of South Miami, the Village of Bal Harbour, the Town of Surfside, and the University of Miami.
- 2) LAZ proposed to purchase 3 Pay by Space machines for the Town at the operator's expense.
- 3) LAZ proposed to provide up 20 complimentary meter pole installations or relocations per year during term of the agreement.
- 4) LAZ proposed to provide complimentary parking consulting including a study for a centralized valet parking operation.
- 5) LAZ proposed to interview and screen all existing Town parking employees for prospective continued employment.

ConsulPark, Inc.-10050 SW 17th Ct., Davie, FI 33324 - 305.725.6915 -www.ConsulPark.com

Exhibit 2

Evaluation of Parking Services Proposals Page 2 October 6, 2011

- 6) LAZ proposed a cost competitive operating expense budget including a \$1,350 per month management fee.
- 7) LAZ proposed a specific transition plan which included the use of their certified enforcement personnel and local management team for the transition.
- 8) LAZ's proposal included a strong section on revenue control and documented procedures to secure the Town's income.
- 9) LAZ's proposal did not include a specific recommendation for the enforcement and citation management process. Instead, a "90 day evaluation period" was suggested and an eventual savings of approximately 15% was estimated. This approach was unique to LAZ's submittal and prevented a solid comparison to the other vendors' recommendations, which both included very specific performance and cost details.

Republic Parking:

Republic Parking is a leader in municipal parking privatizations and is the largest municipal parking operator in terms of the number of cities they operate. Republic is well qualified for this operation given their long list of comparable municipal parking operations.

Based on the evaluation criteria, the major considerations of Republic's proposal are the following:

- 1) Republic has significant municipal experience both nationally and in northern Florida.
- 2) Republic's proposal included their proprietary VATS enforcement and citation management system. This is an excellent system that contains all of the desired components of a enforcement and citation management system including notices, DMV integration, web based payments, reports, etc.
- 3) Republic proposed a cost competitive operating expense budget including a significant reduction in the citation management fees as compared to today's levels.
- 4) Republic's proposal included very specific recommendations for the Town of Lauderdale by the Sea's parking operation. It was evident that much time was spent reviewing the operation and many solid recommendations were provided.
- 5) Republic proposed a specific transition plan which included the temporary re-location of one of their corporate executives.
- 6) Republic proposed to interview and screen all existing Town parking employees for prospective continued employment.

General Parking Consulting Services – Owner Advisory Services – Parking Development Services

Exhibit 2

Evaluation of Parking Services Proposals
Page 3
October 6, 2011

Standard Parking:

Standard Parking is a leader in municipal parking operations and is a large, publicly traded corporation. They have a large presence in South Florida and operate several municipal parking operations nationally and in Florida including Coral Gables, Fort Meyers, Orlando and Miami Beach.

Based on the evaluation criteria, the major considerations of Standard's proposal are the following:

- 1) Standard has significant municipal experience both nationally and in Florida including Coral Gables, Fort Meyers, Orlando and Miami Beach.
- 2) Standard's proposal included the Complus Data enforcement and citation management system. This is an excellent system which contains all of the desired components of the enforcement and citation management system including notices, DMV integration, web based payments, reporting capabilities, etc.
- 3) Standard proposed a cost competitive operating expense budget including a significant reduction in the citation management fees as compared to today's levels.
- 4) Standard's proposal included very specific recommendations for the Town of Lauderdale by the Sea's parking operation. It was evident that much time was spent reviewing the operation and many solid recommendations were provided.
- 5) Standard proposed a specific transition plan which included the use of their local management team and personnel for the transition.
- 6) Standard proposed to interview and screen all existing Town parking employees for prospective continued employment.
- 7) Standard proposed to purchase 4 Pay by Space machines for the Town at the operator's expense.
- 8) Standard proposed to provide complimentary parking consulting services including an annual study for occupancy, turnover and compliance statistics.

Summary:

All three of the shortlisted firms have excellent experience in municipal parking operations and experienced management for the challenges facing the Town of Lauderdale by the Sea. Either of the three would likely succeed if chosen to operate the Town's parking system. Two of the three companies, Republic and Standard, provided detailed operational suggestions specific to LBTS and these two also provided very specific recommendations for enforcement and citation management systems that will provide LBTS immediate savings.

For these reasons, it is the consultant's opinion that these two firms should be given special consideration and ranked as the top two responses. Further, based on Standard Parking's strong South Florida presence, the consultant fully supports the selection committee's top ranking of this firm based on the selection criteria.

- Notes

 1 For the purposed of comparing budget, please calculate enforcement personnel costs on 68 hours per week (3,536 annual).

 The actual number of enforcement hours will be specified in the contract and will take into account vacation and sick leave replacement.

 2 The Town will continue to pays these expenses directly unless the proposer can achieve cost savings that are passed on to the Town

 - The Town sweeps each parking lots and the on-street parking areas each day. If there are additional expanding lots clean, that expense should be in your budget.

 Please complete this section showing the cost for these services.

Ninta

- (1) Estimated at 7.65%
- (2) Calculated salaries results in a difference of \$220 vs proposal.
- (3) Estimated at 2.11%
- (4) Budget does not reflect recent code change which transfers the 28% delinquent fee to ticket holders. Updated here for comparison purposes.
- (5) Because Standard doesn't charge a delinquency fee, these moneys will represent additional revenues to the Town. Shown here as a cost-reduction for comparison purposes.
- (6) Amount above does not include an estimated cost of \$4,056 for vehicle and equipment financing.
- (7) Excluded from proposal
- (8) Represents the difference between the 24% fee charged by Republic and the 28% fee charged to ticket holders.
- (9) Amount above does not include an estimated cost of \$5,324 for vehicle and equipment financing.
- (10) Standard's proposal includes providing 4 pay stations. For comparison purposes, pay stations are valued based on prices paid by the Town for existing pay stations (calculated as \$11,890 per pay station times 4 pay stations divided by 3 years).
